

Alkaline, button cell and rechargeable batteries & battery chargers

We have a very comprehensive and excellent value for money range of batteries, with even more featured on our website. For the full range please visit www.DeafEquipment.co.uk or contact Customer Services

Rechargeable Batteries

Rechargeable batteries – are they worthwhile?

Yes! Rechargeable batteries can be used again and again. Generally speaking, rechargeable batteries cost between 2-5 times the price of a disposable conventional battery. However although they cost you more to buy they are better value for money as they can be re-used up to 1000 times.

Rechargeable batteries can be used for almost anything that normally requires batteries – there are a few exceptions but these are clearly indicated by the manufacturer of the equipment concerned.

Rechargeable batteries have up to 28 times less impact on climate change than disposable alkaline batteries.

6 Batteries & Battery Chargers

Hearing aid batteries

Connevens offer three brands of Zinc Air hearing aid batteries. There is no 'best' battery, different people prefer different makes and different batteries suit different hearing aids. **The choice is yours!**

Rayovac – regarded by many as a market leader.

Power One – made in Germany by Varta Microbattery.

Duracell Activair – a well known quality brand.

Rayovac Air Extra

PowerOne

Activair by Duracell
